OBJECTIVE

Frontend Developer with '4+ years' of experience delivering scalable, owning and shipping production-grade, real-time web applications using React, Next.js, and TypeScript. Skilled in delivering high performance, Good experience with real-time interfaces, performance optimization, and 3D web experiences (R3F, Three.js, Blender). xpert in AI-augmented development workflows, leveraging LLMs (Claude Code) to accelerate shipping cycles by 40% while maintaining elite code quality. scaling products from zero to users. Open to remote and freelance projects.

Skills

- **Frontend:** React.js, Next.js, React Native, HTML5, CSS3, Tailwind CSS, MUI, Bootstrap, Three.js, React Three Fiber (R3F), NativeWind, Framer Motion
- **Languages:** TypeScript, JavaScript
- **AI & Velocity:** AI-Augmented Coding (Claude Code), Prompt Engineering for UI Scaffolding, Automated Code Reviews.
- **3D & Animation:** Blender, Lottie (Bodymovin)
- **Video Editing:** Adobe After Effects, Adobe Premiere Pro
- **Real-Time Performance:** WebSockets, async pipelines, event-driven UI, Zustand, client-server state sync, caching strategies, Web Audio API
- **DevOps & Hosting:** GitHub, GitHub Actions, CI/CD pipelines, Vercel

REAL-TIME VOICE AI INTERFACE

Voice AI Web App · [Live on Vercel](https://sphere-red.vercel.app) (<https://sphere-red.vercel.app>)

- Designed and shipped a real time, browser-based voice interface with audio capture, transcription flow and AI-driven responses.
- Built a UI pipeline to handle recording, processing and response states
- Implemented audio-reactive 3D visualization using R3F to provide UI feedback during voice interactions, also used WebSockets for low-latency audio events and AI Stream.
- Structured the frontend to treat AI as a backend capability, interactions event-driven.
- Deployed to production in vercel and validate with real users.

Tech: Next js, typescript, R3F, Web audio API, Media Recorder, vercel, github

EXPERIENCE

Frontend Developer

Oct 2022 – Present | Chennai, India

- Accelerated development velocity by 40% by integrating AI-assisted workflows (Claude Code) to scaffold complex Next.js components and convert Figma designs into reusable, type-safe UI patterns.
- Reduced refactoring time by 50% for legacy modules by leveraging LLMs to modularize large files, optimize rendering, and resolve complex async/state-management build errors.
- Delivered 8+ client websites and a SaaS product end-to-end, resulting in 5 long-term retainers and 30–50% growth in user engagement, also Designed and shipped a real time AI based voice interface with audio capture.
- Built type-safe REST APIs using TypeScript (Next.js, Node.js), achieving 50–75% faster data fetch speeds.

- Developed SEO-optimized Next.js applications using SSR and serverless APIs, reducing client-side JavaScript load by 60%.
- Implemented CI/CD pipelines with GitHub Actions for automated testing
- Modeled a 3D scrollable cosmos scene in Blender, and integrated it using React Three Fiber, communicate complex concepts through immersive visuals and Animated using Framer Motion.
- Built a React Native mobile app for a school expo; implemented Clerk for authentication and exported the project as a fully functional APK.
- Created animated SVGs for an entire website; exported from After Effects using Bodymovin as Lottie-compatible JSON animations.

FREELANCE | Frontend Developer

Nov 2021 – Dec 2025

- Built SEO-friendly SaaS landing pages using HTML, CSS, and JavaScript, boosting organic traffic by 60%.
- Managed full deployment pipelines including Hostinger (hPanel) setup, SSL provisioning, and performance tuning— cutting go-live time by 50%

IMPACT PROJECTS

Sphere - Voice AI Interface

- Architected a real-time, browser-based voice interface; integrated APIs and generated complex request logic using AI-assisted reviews to improve reliability and debug edge cases.
- Implemented audio-reactive 3D visualizations using R3F and WebSockets for low-latency events, ensuring an elite, immersive user experience

Manvasam — Premium B2B Export Branding

- Spearheaded the end-to-end UI/UX design and frontend architecture for a global B2B coconut export platform, marking my debut in professional product design and visual storytelling.
- Engineered an immersive, high-conversion branding experience that communicates sustainability and industrial scale to international stakeholders.
- Reduced iteration cycles by 30% by leveraging AI-augmented workflows for rapid code cleanups, asset optimization, and ensuring pixel-perfect alignment with the original design vision.

ACHIEVEMENTS

- Multi-Disciplinary Delivery: Successfully delivered across web development, 3D animation (Blender), and professional video post-production (Adobe Premiere Pro & After Effects).
- Technical Communication: Interfaced directly with international clients' technical teams to manage design reviews and technical delivery.
